

TRAINING ON THE JOB **CERTIFIED INDUSTRIAL CHANGE AGENT**

UNIVERSITÄT
LEIPZIG

OUR MISSION

We are dedicated to providing theoretical insight as well as practical experience developing small and medium-sized enterprises (SMEs).

Due to our location in Germany, we have consistently had the opportunity to learn from successful German SMEs and to analyze, in detail, their best practices and winning experiences.

These exceptional firms of the “Mittelstand,” as they are called in Germany, are known worldwide for their dynamism and constant innovation. Not surprisingly, many of them have managed to achieve leadership positions in a number of different countries and markets by offering high-value added products and services.

For these reasons, we have decided to base our program on the patterns of the outstanding German Mittelstand. Our main goal is to transmit this knowledge to firms and institutions from all over the world in order to implement winning strategies to successfully promote SMEs.

CONCEPT INDUSTRIAL CHANGE AGENT

The world is changing and so does today's fast-paced business market all the time. A company's capability to be flexible and to adopt their environmental changes is more crucial today than a few years ago. To meet those challenges with the purpose to improve a company's performance, to innovate internal processes, workflow and reinvigorate competitiveness or product development it needs proactive change management.

Industrial Change Agents (ICA) play a unique role in driving successful change in a company's development across industries. Not only do they support the specific solution development and expertise but they are often a key player in the change management activities that support innovation in the implementation process.

Industrial Change Agents are in-company process innovators who drive changes through improvement projects. The purpose of an Industrial Change Agents is to enhance manufacturing or service quality (technical side) and additionally lead ongoing improvement processes in the day-to-day practices within the company (management side).

The Training is dedicated to managerial staff and employees (Production, Planning, Marketing, Office, Processing, Administration) who are responsible for process efficiency improvement projects and would like to acquire necessary skills of Lean Management and Smart Production, for instance:

- Middle-Management Executives
- Staff Members
- Process Owners
- Team leaders
- Shop-floor Managers

in the private and public business sector.

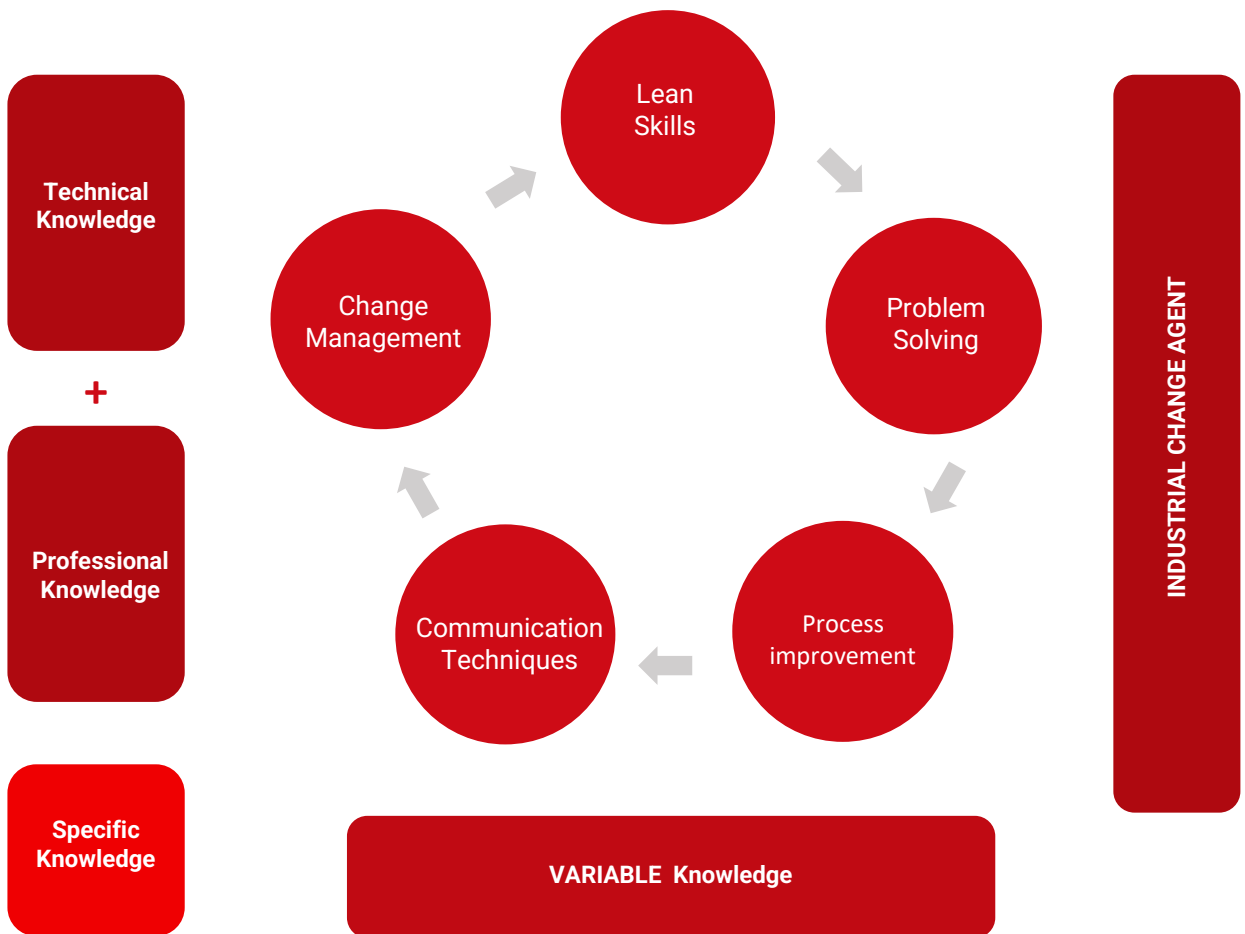

The course is offered by the Small Enterprise Promotion and Training Program (SEPT) of Leipzig University and the specialized consultancy firm CONOSCOPE GmbH, both from Germany.

INDUSTRIAL CHANGE AGENT DESIGN

Industrial Change Agents are high skilled employees and internal process innovators

Process Innovation and Management competencies

TRAINING ON THE JOB
CERTIFIED INDUSTRIAL CHANGE AGENT

METHODOLOGY OF THE TRAINING COURSE

The objective of the course is to make the participants familiar with the application of the different concepts and tools in Process Improvement and Lean Manufacturing in their organizations.

The Certified Industrial Change Agent course combines business management techniques (Customer Added Value) and state of the art process innovation know-how (Process Added Value) for production or service related companies from different industry sectors.

The training course comes with two options:

a) Certified Industrial Change Agent:

Four days Training on in-depth knowledge of Lean Manufacturing methods, techniques and tools used in the introduction of sustainable change activities and process improvement.

b) On-site Operational Excellence (Optional):

Additionally to the training activities participants take part on a Best Practice-Tour in Germany to have a firsthand experience how companies have introduced innovation processes to achieve operational excellence.
